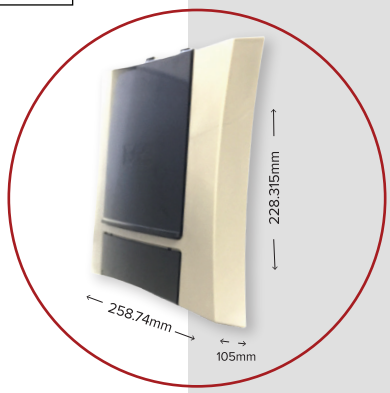
Product Specifications

Product Information

EDGE 22™

The Edge 22™ is the Smart Control hub. It connects with all elements of the system to instruct and report for both the HVAC and water systems.

SPECS	
Dim. (LxWxH)	259mm x 105mm x 228mm
Weight	3 lbs
Power	12vdc 2A wall wart
Wireless	433.9 MHz frequency.



EDGE22™ BASE STATION

Based on a Microchip PIC32MZ microcontroller running at 200 MHZ, it features Ethernet and Wifi connections, 1 USB host, and a series of 4 RJ11 connections to communicate over RS485 with its peripheral devices.

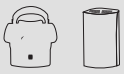
Built-in network connects to LAN and is accessible through the BGS web portal or app.

Rich touch screen interface for easy navigation, setting configurations and device temperatures.

Custom operating system for automation and control; engineered to maximize capabilities and performance.

THE EDGE22™ IS COMPATIBLE WITH:

WATERWATCH BGS CONTROL



BGS CONTROL

Smart Management begins with a Smart System
